

Experience the Future of Sustainable Navigation

The Procraft Electric Cruiser (PEC) 2026

Redefine your maritime journeys with our state-of-the-art electric catamaran, a masterpiece of **Scandinavian modern design**. This vessel harmoniously blends **efficiency** and **emission-free** performance, offering a silent and serene escape on the water. Engineered with a stable catamaran hull, it ensures exceptional **comfort** and **vessel stability**, even in choppy conditions.

Designed for maximum **functionality** and a **high level of equipment**, the cruiser features a unique **bow ramp** for **easy loading and unloading** of both passengers and cargo. Whether used for luxury excursions or practical transport, this vessel sets a new standard for eco-conscious boating without compromising on power or sophistication. The final configuration is always made to order.

Price from EUR 1.2M (ex works shipyard).

Technical Specifications & Key Features

Feature	Specification / Detail
Propulsion System	2 x Torqeedo Deep Blue 50 kW Electric Outboards
Energy Storage	240 kWh High-Voltage Lithium Battery Bank (6 x 40 kWh)
Hull Material	High-Grade Marine Aluminum
Design Philosophy	Scandinavian Modern – Minimalist & Functional
Primary Advantage	100% Emission-Free & Silent Operation
Accessibility	Large Bow Ramp for Easy Cargo and Passenger Access
Stability	Dual-Hull Catamaran Design for Superior Balance
Length / Weight	12 Meters / 14,400 kg
Beam	4 Meters
Charging	Fast-Charge Compatible (Up to 22 kW AC / DC Optional)
Range	Up to 100 nm at Eco-Speeds
