

Procraft Sentinel

Multi-Mission Support Craft (15M–24M)

The Procraft Sentinel represents a premium, multi-mission vessel platform meticulously engineered for demanding maritime support, logistics and professional operations. Built with a heavy-duty steel construction, its highly adaptable and modular deck design makes it the ideal choice for commercial operators, marine maintenance teams and governmental or defense agencies requiring uncompromised reliability in open-sea conditions.

Technical Specifications & Configurations

Feature	Specification / Configuration Options
